HW 3.3

1. How do you show different drive times on the same map (e.g., 5 min, 20 min, 1 hour)?

You would first change the travel mode to driving time and then add 5 min, 20 min, and 60 min cutoffs to display different drive times on the same map.

2. How do you display time buffers instead of distance buffers?

To display time buffers instead of distance buffers, you would change the travel mode to driving time, rerun the tool, and display the layer.
