Term Project Part 1

List two questions that will be answered in your StoryMap from the WebMap you are submitting. For example: Where are X located in San Francisco? Which County in California has the most Xs? How many of X are in area Y? What is the relationship in different census tracts between A and B (where are both high, both low, A is high B is low)? How many muni stations are within a 10 min walk of X facilities? Where is the closest X to building Y?

Question 1:

Which cities in California have had the cleanest (highest AQI) air in the past few days?

Question 2:

Which regions in California are air quality underreported or sparsely reported?
